

Absolute Imaging Solutions Enters into Exclusive Agreement with Mediso Medical Imaging Systems to Distribute the Nucline™ CardioDESK Dual-Head Cardiac SPECT Camera and the AnyScan® S, Single-Head and Dual-Head Large Field-of-View General Purpose SPECT Cameras in the U.S.

Oak Ridge, North Carolina – December 4, 2012 – Absolute Imaging Solutions (AIS) today announced it has reached a five-year, exclusive agreement with Mediso Medical Imaging Systems (Mediso) for the Nucline™ CardioDESK dual-head cardiac SPECT camera and AnyScan® S, Single-Head and Dual-Head large field-of-view general purpose SPECT cameras in the U.S.

The Nucline™ CardioDESK is a dual-head dedicated cardiac camera for cardiac SPECT imaging providing 90-degree fixed detector position with minimal dead space between the detectors and the patient for higher resolution scans. Additional benefits of the Nucline™ CardioDESK include lightweight, ultra small footprint gantry designed for imaging in sitting position, enclosed dual-head detector, no external moving parts for patient safety, and intuitive user interface.

The AnyScan® S, Single-Head and Dual-Head large field-of-view general-purpose SPECT cameras makes it possible to integrate the system into different clinical settings. The AnyScan® S offers ergonomic open design gantry, small footprint, robust mechanical design with improved safety factor, dual infrared line auto body contouring, and pre-programmed robotic gantry motions with full automatic motion calibration. In addition, the flexible modular system architecture provides a pathway to offer variety of models within the AnyScan® family.

AIS President, Mark Shina stated, “AIS has had great success with the Mediso cardiac SPECT camera line. Our customers love the small footprint, excellent image quality, ease of use, and the low cost of ownership. AIS is excited to expand our relationship with Mediso to include the AnyScan® S.”

Mediso Medical Imaging Systems, Founder and Managing Director, István Bagaméry stated “Having worked closely with Absolute Imaging Solutions in the past, we knew they would be a good fit in our plans to accelerate growth of SPECT camera sales in the U.S.”

About Mediso Medical Imaging Systems (Mediso)

Mediso Medical Imaging Systems with headquarters in Budapest, Hungary is a dynamic supplier of Nuclear Medicine and modern Hybrid Imaging techniques to the health care and medical research institutions of the world. The company was founded in 1990 by experts of the largest research and manufacturing company of the region, which has been engaged of nuclear equipment manufacturing since 1960. Currently Mediso offers 4 imaging modalities - SPECT, PET, CT, MRI - for professionals working in laboratories and nuclear medicine departments. Mediso products are sold worldwide directly and through a network of distributors. Mediso has imaging systems operating in more than 85 countries around the world.
